

**GARTNERIET APIARY 2019**  
**Bygdø Kongsgård in Oslo**  
**Liquid Autumn honey, multifloral**

The honey has a nutty flavour with bursts of star anise, almonds, mint and cherries. The aroma is rich and spicy. The honey tastes and smells like Christmas.

Veslemøy Hvidsten, ByBi Sommelier.

The bees have foraged Bygdøy's lush landscape and diverse flora. The flowers include Linden (*Tilia cordata*), raspberry (*Rosaceae*), and wildflowers such as cow parsley (*Apiaceae*) and sun spurge (*Euphorbia*).

Botanical origin determined through pollen analysis by botanist and researcher Helge Høeg.
